5th World Conference

American Configurations - Configurações Americanas

July 27th - 29th 2011

**Universidade Federal Fluminense
Gragoatá Campus, Niterói, Rio de Janeiro, Brasil**

Theme

America with its multiple narratives, landscapes, languages, and experiences,□ projects itself in time like a mosaic in movement: a mosaic of cartographies imagined over time and□ projected in the descriptions of travelers and scientists, in fiction and poetry, in the discourses of politicians and□ activists, and in the images of photographers, artists, and filmmakers.□ The 5th IASA World Conference proposes to be a space for debating how different communities form senses of Americanness, originating from places of knowledge, politics, art, memory, and□ lived experience, where a possible "America" may be configured. Possible foci include imagination and images, memory and community, geographies of power, time and Americanness, routes and 'scapes', traditions in perspective and possible modernities
